WEATHER SYNOPSIS BY REGION

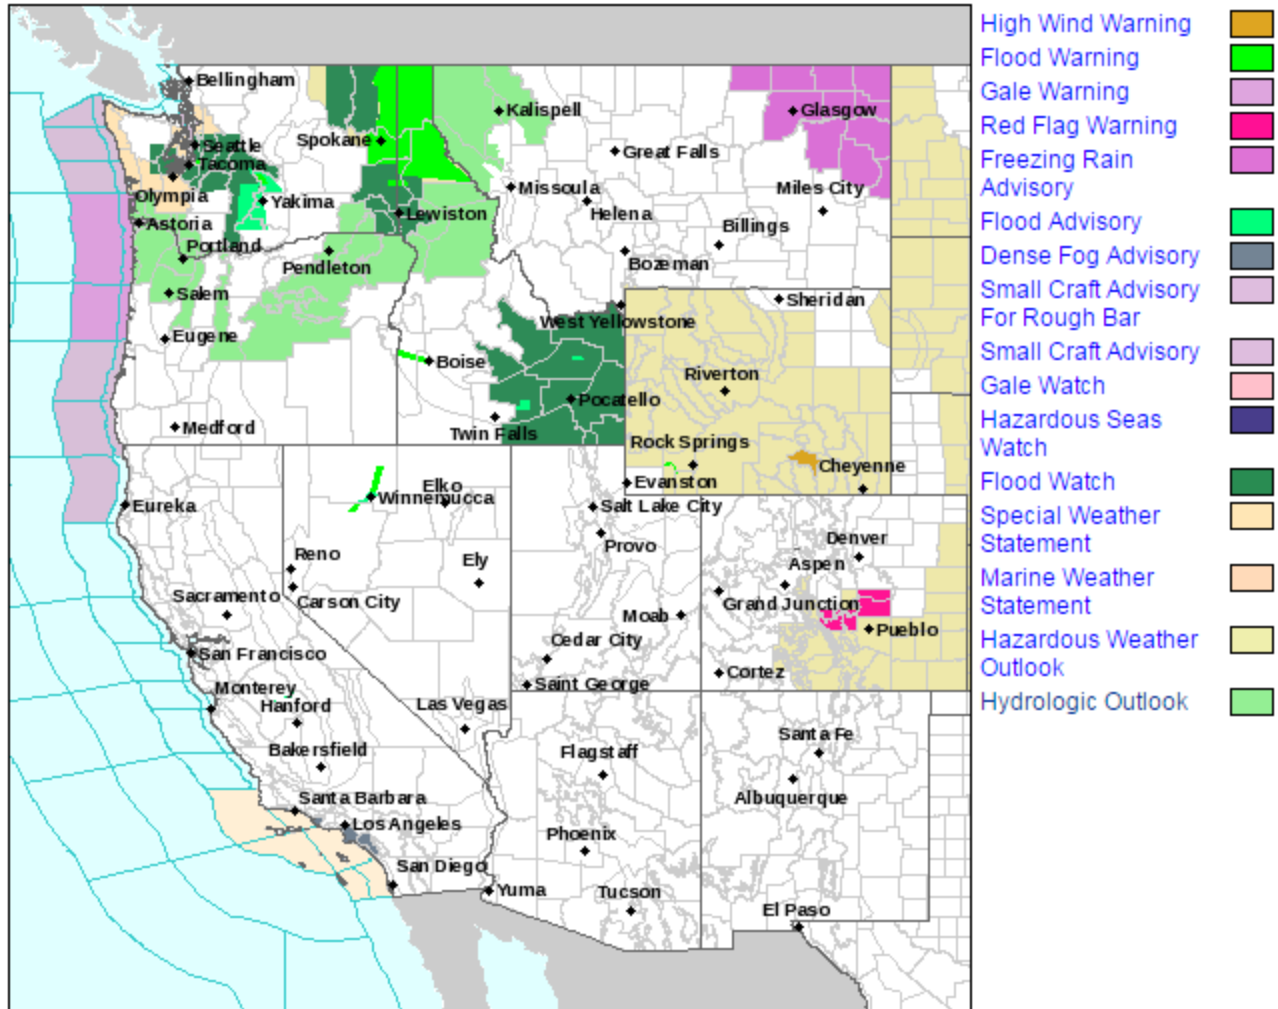

NORTHERN CALIFORNIA

High pressure will continue over the region today into Tuesday with mostly sunny skies and unseasonably mild conditions in many areas. The warmest inland areas will once again be in the upper 70s to low 80s this afternoon and be just a few degrees cooler than that Tuesday. High temperatures over the next few days will be generally be about 15 degrees above normal. Later Tuesday the high will begin to lose its influence over the region as another period of unsettled weather and a series of weather systems lines up for the region. The first system is expected ashore Tuesday night and will bring fairly light precipitation in Wednesday into early Thursday. Most of the precipitation with this system will be in the northwest quarter of the region. Dry weather will return later Thursday and continue Friday but with variable cloudiness. The next weather system will arrive over the weekend with most areas eventually seeing some precipitation develop. Wet conditions are expected to continue into early next week across the region. Snow levels through the weekend will be relatively high, at least 6000 feet and higher, but they will likely drop a couple thousand feet by the middle of next week with a colder system coming in. Also expect areas of gusty southerly winds Saturday in particular.

SOUTHERN CALIFORNIA

A strong ridge of high pressure over the region will cause temperatures to remain 10 to 20 degrees above normal through Tuesday, with mid 60s to mid 70s across the mountains and 80s to low 90s in the valleys. Winds will be light through Tuesday. The ridge will weaken bringing around 5 degrees of cooling Wednesday and Thursday before the ridge strengthens once again Friday. Minimum humidity will be mainly in the teens away from the coast and San Joaquin Valley through Friday. Significant cooling and an increase in humidity will occur this weekend as a Pacific trough approaches the West Coast. Southwest to west winds of 15 to 25 mph with gusts to 40 mph will surface across the mountain ridges and desert passes Wednesday afternoon through Thursday evening and again Saturday afternoon through Sunday evening.
